

# Maize Thresher

## Description

The thresher will receive dried maize cobs and will efficiently remove the kernels from the cob in preparation for winnowing and milling. Although it has a very high production rate, it requires minimal power and is very portable.

## Specification

Product Name	Maize Thresher
Model Number	MT01
Production Rate	Maize: 300 - 400kg/hour
Machine Size (L*W*H)	750 x 270 x 700mm
Net weight (kg)	Approximately 25kg
Power required	400W - 750W

## Options

We are able to configure this machine in a variety of power formats.

DC 12V, DC 24V, DC48V.

AC single phase
